

IN THE SPECIFICATION

Please amend the specification as follows:

Page 7, line 10, after the sentence ending "allowing light to pass therethrough." please enter --Referring to Fig. 1a, branch 15 extends in a horizontal (first) direction, and includes a first end 15₁, a second end 15₂, and a side edge 15₃ extending between first end 15₁ and second end 15₂ in the horizontal (first) direction. Similarly, branch 14 includes a first end 14₁, a second end 14₂, and a side edge 14₃ extending between first end 14₁ and second end 14₂ in a diagonal (second) direction. The second end 14₂ of branch 14 abuts the side edge 15₃ of branch 15 such that the interface is parallel to the branch 15 (i.e., horizontal), and forms an incidence angle θ_1 relative to the side edge, and the side edge 14₃ of the second branch 14 forms an angle (θ_2) with the first side edge 15₃ of the first branch 15.--;

Page 7, line 21, change "from port 19 passes through branch 15, meets branch 14 with incident angle θ_1 " to --from port 19 passes through branch 15, meets the interface between the second end 14₂ of branch 14 and the side edge 15₃ of branch 15 with incident angle θ_1 --.
